Incident Lifecycle Automation in ServiceNow

Phase 3: Incident Record Creation

Name	KARISHMA B
Project Name	Incident Lifecycle Automation in ServiceNow
Date	10 October 2026
Marks	

Phase 3 - Incident Record Creation

Objective

To create an incident record for the reported issue and to automate the capture of key details.

Description

An employee reported that emails could not be sent or received. An incident was created in ServiceNow, and the number, state and timestamps were generated automatically by the platform.

Steps Performed

1. Navigated to Incident > Create New.
2. Selected the Caller and entered a clear Short Description.
3. Selected the Service and Service Offering created in Phase 2.
4. Entered the detailed description, impact and urgency of the issue.
5. Submitted the record; ServiceNow automatically generated the incident number and set the state to New.

Configuration Details

Field	Value
Number	INC0010001 (auto-generated)
Caller	Employee user
Short Description	Unable to send or receive emails
Service / Offering	Corporate Email Service / Corporate Email - Production
State	New

Expected Output

Incident INC0010001 is created with the correct caller, service and description.
