Incident Lifecycle Automation in ServiceNow

Phase 5: Knowledge Integration

Name	KARISHMA B
Project Name	Incident Lifecycle Automation in ServiceNow
Date	10 October 2026
Marks	

Phase 5 - Knowledge Integration

Objective

To integrate the Knowledge Base with the incident so agents can find known solutions quickly.

Description

Searching existing knowledge articles reduces resolution time and avoids repeated work. From the incident form, the agent searched the knowledge base and attached a relevant article.

Steps Performed

1. Enabled the Knowledge search option on the incident form.
2. Searched the knowledge base using the keyword "email".
3. Opened the matching article and reviewed the troubleshooting steps.
4. Attached the article to the incident using the Attach Knowledge option.
5. Verified the article appears in the incident Related Records / activity stream.

Configuration Details

Item	Details
Knowledge Base	IT
Search Keyword	email
Article Used	Troubleshooting email send/receive issues
Linked To	INC0010001
Benefit	Faster diagnosis using existing solutions

Expected Output

A knowledge article is linked to the incident to guide the support agent.
