Incident Lifecycle Automation in ServiceNow

Phase 10: Incident Resolution

Name	KARISHMA B
Project Name	Incident Lifecycle Automation in ServiceNow
Date	10 October 2026
Marks	

Phase 10 - Incident Resolution

Objective

To resolve the incident after the change is implemented and to record the resolution details.

Description

After the emergency change was implemented and mail flow was tested, the incident was resolved with a proper close code and notes. The caller was notified automatically.

Steps Performed

1. Implemented the emergency change and verified that emails were sent and received.
2. Closed the change request as successful.
3. Opened the incident and moved the State to Resolved.
4. Entered Close Code "Solved (Permanently)" and detailed Close Notes.
5. Saved the record; the caller received an automatic resolution notification and child incidents were resolved.

Configuration Details

Field	Value
State	Resolved
Close Code	Solved (Permanently)
Close Notes	Mail transport service restarted and configuration corrected via emergency change
Resolved By	Level 2 Engineer
Caller Notification	Sent automatically

Expected Output

The incident is resolved and documented, and the caller is informed.
