Incident Lifecycle Automation in ServiceNow

Phase 11: Knowledge Creation

Name	KARISHMA B
Project Name	Incident Lifecycle Automation in ServiceNow
Date	10 October 2026
Marks	

Phase 11 - Knowledge Creation

Objective

To create a new knowledge article from the resolved incident for future reuse.

Description

To avoid repeating the investigation, a knowledge article was generated from the resolved incident. This turns the solution into reusable organisational knowledge.

Steps Performed

1. Opened the resolved incident and selected Create Knowledge.
2. ServiceNow copied the short description and resolution notes into a new article.
3. Edited the article to add symptoms, cause and step-by-step resolution.
4. Selected the Knowledge Base and Category, then submitted for review.
5. The Knowledge Manager approved and published the article.

Configuration Details

Field	Value
Article Title	Resolving email send/receive failure due to stopped mail transport service
Knowledge Base	IT
Category	Email
Source	INC0010001
Status	Published

Expected Output

A published article is available for future incidents of the same type.
