Incident Lifecycle Automation in ServiceNow

Phase 7: Incident Tracking by Level 2

Name	KARISHMA B
Project Name	Incident Lifecycle Automation in ServiceNow
Date	10 October 2026
Marks	

Phase 7 - Incident Tracking by Level 2

Objective

To track and investigate the incident at Level 2 until the root cause is identified.

Description

The Level 2 engineer picked up the incident, monitored the SLA, updated work notes and found that the mail server service needed a restart and configuration fix.

Steps Performed

1. Level 2 agent opened the incident from the group queue and accepted ownership.
2. Reviewed the earlier work notes and the SLA timer.
3. Investigated the mail server and identified the root cause as a stopped mail transport service.
4. Added detailed work notes and kept the caller updated using additional comments.
5. Decided that an emergency change is required to restore the service.

Configuration Details

Item	Details
Assigned To	Level 2 Engineer
SLA Status	In progress, within target
Root Cause	Mail transport service stopped on the production mail server
Work Notes	Updated after every action
Next Action	Raise an Emergency Change Request

Expected Output

Root cause is identified and the need for an emergency change is confirmed.
