Incident Lifecycle Automation in ServiceNow

Phase 2: Create New Service, Service Offering

Name	KARISHMA B
Project Name	Incident Lifecycle Automation in ServiceNow
Date	10 October 2026
Marks	

Phase 2 - Create New Service, Service Offering

Objective

To create a new Business Service and Service Offering so that incidents can be linked to the affected service.

Description

Linking an incident to a service helps the support team understand business impact and supports automatic assignment and prioritisation. A service and an offering were created for the test scenario.

Steps Performed

1. Logged in to the ServiceNow instance as System Administrator.
2. Navigated to Service Portfolio > Business Services and clicked New.
3. Created the service "Corporate Email Service" and filled in owner, support group and operational status.
4. Navigated to Service Offerings and created the offering "Corporate Email - Production" under the service.
5. Saved the records and verified that the offering is Operational and linked to its parent service.

Configuration Details

Field	Value
Service Name	Corporate Email Service
Service Offering	Corporate Email - Production
Owned By	IT Operations Manager
Support Group	Service Desk
Operational Status	Operational

Expected Output

The service and service offering are available and can be selected on incident records.
